★ Canada's strength is a tribute to the strength of her people. Alberta's strength is the strength of the oil that flows from her earth.

With over 700,000 people, producing \$100,000,000 of wealth every year from agriculture, forestry, mining, cropping, fisheries, manufacturing, exporting some 5,000,000 tons of these products, with some 60,000 miles of roads, with 10,000 airports, 100,000 cars—passenger, truck and farm equipment, increasing under 1,000,000 cars, and thousands of homes that come by rail, sea and road say Alberta is "large".

But in addition to all these rich—dense grass fields, dense forests, fields and birds, there is more and more...new wealth has come to the Turner Valley Oil fields, estimated to be the largest in the British Empire.

Present production of the field is now 10,000,000 barrels per month. Two new streams will be built in Calgary at a cost of \$12,500,000, and a half million dollars will be spent in additional to an existing plant. The output of the Turner Valley Oil field will approximate \$10,000,000 per month.

The significance to Canadians is that the gift of nature is located within the Confederation of Canada's Provinces—The Dominion—and therefore is one of the assets of the Empire. Alberta is great in her own right, but in a sense a great asset of the Dominion, something from the Atlantic to the Pacific she enjoys the privilege and standing of the Atlantic and West.

And hope you will visit this province in your own car.

Ask for Facts and Figures concerning the Automotive Industries and the work they are doing in Canada, and we will send them.

The advertisement is one of many others that the Director of the Department of Transport will send you on request. Write to the Director, Department of Transport, Ottawa, Ontario.

BUILDING CANADIAN MOTOR CARS is a National Enterprise

The establishment of Canada's automotive industry has resulted in the creation of a new industry of considerable value to our country and to the Dominion. The manufacture of motor cars and trucks is an important part of our economy and the industry alone employs in the Dominion as many as 100,000 people. In 1958, Canadian motor car production was valued at \$1,000,000,000 which is a record for this country. In 1959, Canadian motor car production is expected to reach \$1,200,000,000. This industry is a source of pride and a source of employment. The dollar value of the industry is a source of pride and a source of employment. The dollar value of the industry is a source of pride and a source of employment.

ATHLETE'S FOOT flourishes on Hot, Steaming Feet

athlete's foot. Athlete's foot is a common skin condition that causes itching, burning, and blisters between the toes. It is caused by a fungus that thrives in warm, moist environments.

That CRACK between your toes signals DANGER

A crack between the toes is a warning sign of athlete's foot. It is caused by a fungus that thrives in warm, moist environments. The crack is often accompanied by itching, burning, and blisters.

DRYNESS OF SKIN usually leads to athlete's foot

Dry skin is a common condition that leads to athlete's foot. It is caused by a fungus that thrives in warm, moist environments. The dry skin is often accompanied by itching, burning, and blisters.

Drench them with ONCE

Once a day, drench your feet with a solution of absorbine Jr. to keep them dry and prevent athlete's foot. The solution is made of absorbine Jr. and water.

ABSORBINE JR. KILLS A THICK RING OF Fungus

Absorbine Jr. is a powerful antifungal agent that kills a thick ring of fungus. It is made of absorbine Jr. and water. The solution is made of absorbine Jr. and water.

Also, absorbine Jr. kills a thick ring of fungus. It is made of absorbine Jr. and water. The solution is made of absorbine Jr. and water.

absorption and perhaps the formation of a ring. This I should be able to handle in a matter of days, but having seen several people with athlete's foot, I must say, he's working hard against it. But this will not be enough. I have decided to use absorbine Jr. I have a receipt for the bottle. I have a receipt for the bottle. I have a receipt for the bottle.

My friend's mother-in-law, who is a nurse, told me that she had seen several people with athlete's foot. She said that she had seen several people with athlete's foot. She said that she had seen several people with athlete's foot.

The doctor should see the whole problem off and ready to say that he's not doing anything for me. I'm not doing anything for me. I'm not doing anything for me. I'm not doing anything for me.

The doctor should see the whole problem off and ready to say that he's not doing anything for me. I'm not doing anything for me. I'm not doing anything for me. I'm not doing anything for me.

They Were Fine Old Days...but ...A Smoke is "Smoother" Now

MEMORIES of the past come crowding forward as after-dinner smoke curls lazily upward. "Great days, they were... great days," says Sally's father. "But you moderns are fortunate, Sally—your cigarettes today are always in 'Cellophane'. In my day we couldn't be sure of getting fresh and satisfying cigarettes, but now—! Why, I can buy my smokes anywhere—and at any time of the year—and know positively that they're always as good as when they left the factory."

It's perfectly true. Today—cigarettes, cigars and tobacco are all *conditioned*—kept just right for enjoyable smoking—by the remarkable protective qualities of "Cellophane" cellulose film.

Cellophane
REGISTERED TRADE MARK
C-I-L CELLULOSE FILM

Past generations were denied the assurance that you get today—the assure that tobacco's flavour, taste and aroma is maintained, sealed in by the use of mureproof "Cellophane".

Continuous improvement in manufacturing processes has permitted the production of finer tobacco products. Remember that a higher standard of quality is now consistently preserved for your greater enjoyment the over-wrap of "Cellophane".
